Document Date: [Date] | Version: 1.0

ABOUT THIS PROPOSAL

This proposal outlines a professional Jira implementation service tailored to your team's needs. It includes a full breakdown of services, transparent pricing, a realistic delivery roadmap, and an ongoing support model—so you know exactly what you're getting and when.

EXECUTIVE SUMMARY

You're looking for a Jira implementation that actually works—one that's set up correctly from day one, fits the way your team operates, and doesn't require constant firefighting afterward. That's exactly what this engagement delivers.

I'm a Jira Certified Implementation Specialist with hands-on experience delivering Scrum, Kanban, and enterprise Jira setups across industries. I work as a solo freelancer, which means you get direct, senior-level expertise—not a junior handed your project after a sales call.

What You Get

- ▶ A fully configured Jira environment built around your team's real workflow
- ▶ Automation that eliminates manual admin and repetitive tasks
- ▶ Dashboards and reports your managers will actually use
- ▶ Training so your team hits the ground running
- ▶ Structured handover documentation you'll refer to for years

SCOPE OF SERVICES

Services are delivered based on your access level. All services are available for Jira Cloud, Jira Software (Server/DC), and Jira Service Management.

1. Admin-Level Services

Requires Jira System Administrator access. Full environment configuration from the ground up.

Environment & Instance Setup

- ▶ Jira Cloud provisioning: URL, locale, timezone, language configuration
- ▶ User management: accounts, groups, roles, and deactivation
- ▶ Global permission schemes and access control
- ▶ SSO/SAML integration (Okta, Azure AD, Google Workspace)
- ▶ App installation and licence management (ScriptRunner, Structure, etc.)
- ▶ Email/SMTP configuration and notification testing

Workflow & Issue Type Configuration

- ▶ Custom workflows: statuses, transitions, conditions, validators, post-functions
- ▶ Issue type schemes: Epic, Story, Task, Subtask, Bug, Change Request, Risk
- ▶ Screen schemes and issue type screen schemes

Field Configuration & Custom Fields

- ▶ Create and configure custom fields (Text, Select, Date, Number, Multi-Select, Cascading)
- ▶ Field contexts, required/optional settings, and screen placement
- ▶ ScriptRunner Behaviours for advanced field validation

Global Automation

- ▶ Multi-project automation rules (global scope)
- ▶ Scheduled automations: digest emails, SLA alerts, weekly reports
- ▶ Webhook configuration for Slack, Teams, CI/CD pipelines

2. Project Admin-Level Services

Requires Project Administrator role. Most common access level—covers the majority of Scrum/Kanban setup work.

Scrum & Kanban Board Configuration

- ▶ Scrum or Kanban boards with custom column mappings and swimlanes

- ▶ Quick filters, card colours, sprint capacity planning
- ▶ Backlog and sprint planning view configuration

Project-Level Automation

- ▶ Auto-assign by component, label, or issue type
- ▶ Parent story auto-close when all subtasks complete
- ▶ Slack/Teams/email notifications on status transitions
- ▶ Sprint start/end notifications and bug escalation rules

Saved Filters, JQL & Dashboards

- ▶ Advanced JQL filters for ops, release tracking, and bug triage
- ▶ Project dashboards with gadgets for team and stakeholders
- ▶ Release readiness dashboard for pre-release go/no-go decisions

3. User-Level Services

Suitable when admin access cannot be granted. Substantial value through documentation, specifications, and training.

- ▶ Requirements gathering and process mapping
- ▶ Detailed Jira configuration specifications for your internal admin
- ▶ JQL filter library (pre-written, tested, ready to save)
- ▶ Automation logic documentation (trigger → condition → action)
- ▶ Live training sessions (1:1 or group), Loom video walkthroughs
- ▶ Jira usage SOPs: Standard Operating Procedures for daily use

PRICING

Hourly Rates

Service	Access Level	Rate/Hour	Min. Hours
Discovery & Requirements	User-level	₹2,500	3 hrs
Project Configuration (Basic)	Project Admin	₹3,000	5 hrs

- ▶ 3 training sessions (Admin, Project team, Leadership)
- ▶ Full configuration documentation + video walkthroughs
- ▶ 2 months of post-delivery email + 2 hrs/month video call support
- ▶ Delivery: 20–30 business days

Package	Price	Team Size	Delivery	Post-Delivery Support
Starter	₹25,000	Up to 10 users	5–7 business days	2 weeks email
Professional	₹65,000	10–30 users	10–14 business days	1 month email
Enterprise	₹1,40,000	30+ users	20–30 business days	2 months + 2 hrs/month video
Custom / Bespoke	Quote on request	Any size	To be agreed	Custom retainer

DELIVERY APPROACH

This engagement follows a structured 7-phase delivery methodology. Every phase has defined activities, inputs, outputs, and quality gates.

Phase	Duration	Key Activities	Output
Phase 1: Discovery	1–2 days	Discovery call, process mapping, requirements gathering, config plan sign-off	Discovery Report + Config Plan
Phase 2: Environment Setup	1–2 days	Instance access, users, groups, apps, project creation	Live Jira project (empty)
Phase 3: Project Configuration	2–5 days	Workflow, fields, screens, board, epics, backlog structure, Fix Versions	Fully configured project
Phase 4: Automation & Filters	1–3 days	Automation rules, JQL filters, dashboards, Slack/GitHub integrations	Working automations + dashboards
Phase 5: Testing & UAT	1–2 days	End-to-end testing, UAT session with client team, defect resolution	UAT sign-off document
Phase 6: Training & Go-Live	1–2 days	Training sessions, go-live checklist, board monitoring	Trained team + live Jira
Phase 7: Handover	1 day	Configuration document, admin guide, Loom walkthroughs, final sign-off	Handover Pack + invoice

Timeline by Complexity

Complexity	Team Size	Projects	Est. Hours	Est. Timeline
Simple	1–10 users	1	8–15 hrs	5–7 business days
Medium	11–30 users	2–3	15–30 hrs	10–14 business days
Complex	31–75 users	4–7	30–60 hrs	3–5 weeks
Enterprise	75+ users	8–15+	60–120+ hrs	6–12 weeks

POST-IMPLEMENTATION SUPPORT

Ongoing support ensures your Jira environment continues to work efficiently as your team grows and requirements evolve.

Feature	Tier 1 – Basic ₹5,000/mo	Tier 2 – Standard ₹12,000/mo	Tier 3 – Premium ₹25,000/mo
Email support	✓	✓	✓
Minor fixes (hrs/mo)	2 hrs	5 hrs	10 hrs
Monthly video call	—	30 min	2 × 30 min
Priority response (High issues)	2 business days	1 business day	4 business hours
JQL filters & dashboard updates	—	Up to 3/month	Unlimited
Proactive health audit	—	—	Monthly report
New user onboarding	—	—	Up to 5/month
Rollover hours	None	Up to 2 hrs	Up to 5 hrs
Discounted extra hours	—	₹2,500/hr	₹2,000/hr
Contract term	Month-to-month	3-month minimum	3-month minimum

WHY WORK WITH ME

Senior-Level Expertise, Freelancer Speed

You get a Jira Certified Specialist working directly on your project—not a project manager routing work to juniors. Every decision, configuration, and automation is done by the person you hired.

Transparent, Fixed-Price Delivery

No scope creep surprises. Fixed-price packages have clearly defined deliverables. Hourly work is tracked and reported weekly. You approve before we proceed.

Real-World Methodology

The 7-phase delivery process is built from actual freelance engagements—not a consulting playbook designed for teams of 10. Timelines are honest, not padded.

Structured Handover

You'll never be stuck without documentation. Every engagement ends with a full configuration document, admin guide, and where agreed, Loom video walkthroughs—so your team is never dependent on me to make changes.

NEXT STEPS

Ready to move forward? Here's how we get started:

- ▶ Choose a package (Starter / Professional / Enterprise) or agree on an hourly engagement
- ▶ Complete and return the Discovery Questionnaire (shared separately)
- ▶ Review and sign the Statement of Work / Freelance Agreement
- ▶ Pay the deposit: 50% upfront for fixed-price packages; ad hoc billed weekly
- ▶ Book the Discovery Call: [calendly-link or your contact details]

All prices are exclusive of applicable taxes. Payment terms: Net 7 from invoice date.
