

JIRA IMPLEMENTATION CHECKLIST

(Enterprise Rollout – End-to-End)

PHASE 1 – REQUIREMENT GATHERING

- ☐ Identify project type (Software / ITSM / Business)
- ☐ Define team size and structure
- ☐ Define user roles (Admin, Dev, QA, PM, Stakeholder, Agent)
- ☐ Define workflow stages
- ☐ Define SLA requirements (if Service Management)
- ☐ Identify required custom fields
- ☐ Identify required reports & dashboards
- ☐ Identify integrations (GitHub, CI/CD, Email, etc.)
- ☐ Identify migration requirement (Yes / No)
- ☐ Prepare role-permission matrix
- ☐ Prepare workflow diagram
- ☐ Get stakeholder approval

PHASE 2 – GLOBAL SYSTEM CONFIGURATION

General Settings

- ☐ Configure Site Title
- ☐ Configure Default Language
- ☐ Configure Default Timezone
- ☐ Configure Email From Name
- ☐ Configure Indexing Language

Branding & UI

- ☐ Upload Company Logo
- ☐ Configure Favicon
- ☐ Configure Navigation Colors
- ☐ Configure Date & Time Format
- ☐ Enable/Disable ISO8601 week format
- ☐ Configure Announcement banner (if needed)

Global Permissions

- ☐ Create Groups (jira-admins, developers, qa-team, etc.)
- ☐ Assign Administer Jira permission
- ☐ Assign Browse Users permission
- ☐ Assign Share Dashboard permission
- ☐ Restrict Bulk Change permission ⚠

- ☐ Verify Application Access

PHASE 3 – PROJECT (SPACE) SETUP

- ☐ Create Company-managed project
- ☐ Define Project Key
- ☐ Select template (Scrum/Kanban/Service)
- ☐ Assign Project Lead

Space Roles

- ☐ Map Groups → Project Roles
- ☐ Verify default roles (Admin, Developer, QA, etc.)
- ☐ Create custom roles (if required)

Permission Scheme

- ☐ Assign Browse Project permission
- ☐ Assign Create Issue permission
- ☐ Assign Edit Issue permission
- ☐ Assign Transition Issue permission
- ☐ Assign Assign Issue permission
- ☐ Configure Comment Visibility (if restricted)
- ☐ Test using Permission Helper

PHASE 4 – WORKFLOW CONFIGURATION

- ☐ Define statuses
- ☐ Create transitions
- ☐ Configure validators
- ☐ Configure conditions
- ☐ Configure post functions
- ☐ Map workflow to issue types
- ☐ Publish workflow
- ☐ Test transitions

PHASE 5 – FIELDS & SCREENS

- ☐ Create required custom fields
- ☐ Add fields to screens
- ☐ Configure Create Screen
- ☐ Configure Edit Screen
- ☐ Configure View Screen
- ☐ Map Screen Scheme

- ☐ Validate field visibility

PHASE 6 – NOTIFICATION CONFIGURATION

- ☐ Create Notification Scheme
- ☐ Map roles to notification events
- ☐ Configure Default Notifications
- ☐ Configure Digest Notifications (optional)
- ☐ Enable Outgoing Mail (Production)
- ☐ Disable Outgoing Mail (Before bulk update/migration if needed)
- ☐ Validate test email delivery

PHASE 7 – AUTOMATION SETUP

- ☐ Identify automation scenarios
- ☐ Create automation rule (Trigger → Condition → Action)
- ☐ Assign correct rule actor
- ☐ Test automation
- ☐ Verify Automation Audit Log
- ☐ Monitor automation usage limits

PHASE 8 – DASHBOARDS & REPORTING

- ☐ Create shared filters
- ☐ Configure Default Dashboard
- ☐ Add Filter Results gadget
- ☐ Add Pie Chart gadget
- ☐ Add Two-Dimensional Filter gadget
- ☐ Add Recently Created chart
- ☐ Verify filter permissions
- ☐ Enable Auto Refresh (if required)

PHASE 9 – EMAIL & INCOMING MAIL (IF SERVICE MANAGEMENT)

- ☐ Configure Incoming Mail Server
- ☐ Configure Mail Handler
- ☐ Enable Email-to-Issue creation
- ☐ Enable DMARC (if required)
- ☐ Configure loop detection
- ☐ Test email ticket creation
- ☐ Validate comment-from-email functionality

PHASE 10 – IMPORT / MIGRATION (IF REQUIRED)

Before Migration

- ☐ Take backup
- ☐ Clean source data
- ☐ Prepare field mapping document
- ☐ Test in sandbox

Cloud-to-Cloud Migration

- ☐ Import Data (.xml)
- ☐ Import Media
- ☐ Validate users
- ☐ Validate permissions
- ☐ Validate workflows
- ☐ Perform UAT

CSV Import

- ☐ Upload CSV
- ☐ Map fields correctly
- ☐ Validate issue types
- ☐ Validate status mapping
- ☐ Validate data accuracy

Server-to-Cloud

- ☐ Install Jira Cloud Migration Assistant
- ☐ Run pre-migration checks
- ☐ Perform test migration
- ☐ Perform production migration

PHASE 11 – SECURITY & GOVERNANCE

- ☐ Review Audit Log
- ☐ Review Global Permissions
- ☐ Review Group Memberships
- ☐ Review Permission Schemes
- ☐ Restrict Bulk Change
- ☐ Configure Backup Strategy
- ☐ Download backup file
- ☐ Store securely

PHASE 12 – GO-LIVE READINESS CHECK

- ☐ Permissions fully tested
- ☐ Workflows validated
- ☐ Automation validated
- ☐ Email validated
- ☐ Dashboards verified
- ☐ Backup taken
- ☐ Announcement banner published
- ☐ Stakeholder sign-off received

PHASE 13 – POST GO-LIVE MONITORING

- ☐ Monitor Audit Log (Weekly)
- ☐ Monitor Automation failures
- ☐ Monitor Email failures
- ☐ Monitor performance
- ☐ Review permission changes
- ☐ Review usage limits (Free/Standard plans)
- ☐ Conduct 2-week stabilization review
